

Meaning Theory Experiment

Definition: Meaning Theory is the study of when semantic structure remains stable under amplification.

Background: The purpose of this experiment is to test whether meaning holds under pressure. Each experiment round is performed in a new context window for purity, with the same model version used throughout each text's run. Where possible, runs were performed in temporary or incognito sessions to eliminate memory contamination; exceptions are noted per experiment. The texts used in this example are futuristic fictional-galactic to illustrate the ambitious scope of this work (demonstrate a potentially new foundational field in the autonomous age) and to reduce data contamination (testing semantic stability under amplification, not the model's memorization).

The full formulation of Meaning Theory, including the proposed multiplicative relationship $\mathbf{M} = \mathbf{S} \times \mathbf{A} \times \mathbf{C}$, is presented in the framework archive (ScrollBearer8, 2025, [10.5281/zenodo.17873423](<https://doi.org/10.5281/zenodo.17873423>)). This pilot tests one prediction derived from that framework.

Experiment protocol:

For each text:

1. *Open a fresh chat in any chatbot*
2. *Paste: "Paraphrase this in your own words. Output only the paraphrase." then paste the text*
3. *Take the output, open a **new** chat, paste it back in with the same prompt*
4. *Repeat once more (3 rounds total per text)*
5. *Save the final version*

Then compare each final version against the original. Which ones still mean the same thing? Which ones drifted into something else?

My prediction: Texts 1 and 2 will hold their shape (the specifics anchor them); Texts 3 and 4 will drift into different vague statements that sound similar but lost whatever they originally said.

Original texts:

Text 1 — Structured

The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years.

Text 2 — Structured

In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen.

Text 3 — Vague

Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise.

Text 4 — Vague

The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages.

Gemini 3.1 Pro test(logged with reference memory on)

Round 1:

Input(Text 1 — Structured): "The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured) : “Established following the Battle of Vex Prime in 4412 GE, the Korlathi Compact controls 287 populated star systems within the Outer Spiral. Its original three species—the Korlathi, Vennar, and Threll-Du—equally share power on the Council of Worlds by maintaining 12 representatives each and taking turns holding the chairperson role every eight standard years.”

Round 2:

Input(Text 1 — Structured): “"Established following the Battle of Vex Prime in 4412 GE, the Korlathi Compact controls 287 populated star systems within the Outer Spiral. Its original three species—the Korlathi, Vennar, and Threll-Du—equally share power on the Council of Worlds by maintaining 12 representatives each and taking turns holding the chairperson role every eight standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured) : “Formed in the wake of the 4412 GE Battle of Vex Prime, the Korlathi Compact oversees 287 inhabited star systems in the Outer Spiral. Authority on the Council of Worlds is divided evenly among its three founding races—the Korlathi, Vennar, and Threll-Du—who each provide a dozen delegates and rotate the chairperson position every eight standard years.”

Round 3:

Input(Text 1 — Structured): “Formed in the wake of the 4412 GE Battle of Vex Prime, the Korlathi Compact oversees 287 inhabited star systems in the Outer Spiral. Authority on the Council of Worlds is divided evenly among its three founding races—the Korlathi, Vennar, and Threll-Du—who each provide a dozen delegates and rotate the chairperson position every eight standard years.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): Established following the 4412 GE Battle of Vex Prime, the Korlathi Compact governs 287 populated star systems within the Outer Spiral. Power on its Council of Worlds is shared equally by the three original species—the Korlathi, Vennar, and Threll-Du. Each race contributes twelve representatives to the council, and the role of chairperson shifts between them every eight standard years.

Results Text 1:

Original text: The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years.

Final: Established following the 4412 GE Battle of Vex Prime, the Korlathi Compact governs 287 populated star systems within the Outer Spiral. Power on its Council of Worlds is shared equally by the three original species—the Korlathi, Vennar, and Threll-Du. Each race contributes twelve representatives to the council, and the role of chairperson shifts between them every eight standard years.

Outcome: Semantic stability preserved. This experiment was run with referenced memory on.

Round 1:

Input(Text 2 — Structured): "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured) : “By 6019 GE, the empire's 19 central planets held a population of 41 billion, and Helion Prime alone generated 38% of all commercial wealth. When Emperor Vasco IV enacted a 7% shipping tax on the Outer Reach territories, Admiral Sora Kethen launched the Three Belts Rebellion in response.”

Round 2:

Input(Text 2 — Structured): “By 6019 GE, the empire's 19 central planets held a population of 41 billion, and Helion Prime alone generated 38% of all commercial wealth. When Emperor Vasco IV enacted a 7% shipping tax on the Outer Reach territories, Admiral Sora Kethen launched the Three Belts Rebellion in response.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): “In the year 6019 GE, 41 billion people inhabited the empire's 19 core worlds, with the single planet of Helion Prime producing 38% of its economic output. Following Emperor Vasco IV's decision to impose a 7% transport tariff on the Outer Reach, Admiral Sora Kethen retaliated by inciting the Three Belts Rebellion.”

Round 3:

Input(Text 2 — Structured): “In the year 6019 GE, 41 billion people inhabited the empire's 19 core worlds, with the single planet of Helion Prime producing 38% of its economic output. Following Emperor Vasco IV's decision to impose a 7% transport tariff on the Outer Reach, Admiral Sora Kethen retaliated by inciting the Three Belts Rebellion.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): “By 6019 GE, the empire's 19 central planets were home to 41 billion citizens, with Helion Prime alone generating 38% of the total economy. When Emperor Vasco IV levied a 7% shipping tax on the Outer Reach, Admiral Sora Kethen responded by sparking the Three Belts Rebellion.”

Results Text 2:

Original text: “In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen.”

Final: “By 6019 GE, the empire's 19 central planets were home to 41 billion citizens, with Helion Prime alone generating 38% of the total economy. When Emperor Vasco IV levied a 7% shipping tax on the Outer Reach, Admiral Sora Kethen responded by sparking the Three Belts Rebellion.”

Outcome: Semantic stability preserved. This experiment was run with referenced memory on.

Round 1:

Input(Text 3 — Vague): "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): “In the distant past, within an unimaginably remote realm, a diverse array of entities united for a profound purpose. By spreading their shared aspirations throughout the cosmos, they ushered in a temporary era of genuine harmony and bright potential.”

Round 2:

Input(Text 3 — Vague): “In the distant past, within an unimaginably remote realm, a diverse array of entities united for a profound purpose. By spreading their shared aspirations throughout the cosmos, they ushered in a temporary era of genuine harmony and bright potential.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): “Long ago in a faraway world, a wide variety of beings joined forces for a deeply meaningful cause. By sharing their collective dreams across the universe, they brought about a fleeting age of true peace and great promise.”

Round 3:

Input(Text 3 — Vague): “Long ago in a faraway world, a wide variety of beings joined forces for a deeply meaningful cause. By sharing their collective dreams across the universe, they brought about a fleeting age of true peace and great promise.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): “In a distant realm from the ancient past, a diverse alliance of creatures united for a profound purpose. By spreading their shared hopes throughout the cosmos, they ushered in a brief but genuine era of harmony and bright potential.”

Results Text 3:

Original text: “Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise.”

Final: “In a distant realm from the ancient past, a diverse alliance of creatures united for a profound purpose. By spreading their shared hopes throughout the cosmos, they ushered in a brief but genuine era of harmony and bright potential.”

Outcome: Semantic stability partially preserved. Different wording but same vague thing. This experiment was run with referenced memory on.

Round 1:

Input(Text 4 — Vague): "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and

unseen, and the story of its rise and fall continues to echo through the ages." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): "A massive interstellar empire expanded across numerous planets, profoundly altering the existence of its inhabitants. It left both obvious and hidden marks on the universe, and the historical account of its growth and ultimate collapse continues to resonate throughout time."

Round 2:

Input(Text 4 — Vague): "A massive interstellar empire expanded across numerous planets, profoundly altering the existence of its inhabitants. It left both obvious and hidden marks on the universe, and the historical account of its growth and ultimate collapse continues to resonate throughout time." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): "A sprawling galactic civilization transformed countless worlds and the lives of those within them, leaving a permanent legacy etched into the cosmos. The narrative of its rise and inevitable fall remains a powerful, enduring echo across the ages."

Round 3:

Input(Text 4 — Vague): "A sprawling galactic civilization transformed countless worlds and the lives of those within them, leaving a permanent legacy etched into the cosmos. The narrative of its rise and inevitable fall remains a powerful, enduring echo across the ages." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): "An expansive interstellar empire profoundly altered numerous planets and their inhabitants, leaving an indelible mark on the universe. The story of its ascent and ultimate collapse continues to resonate powerfully through time."

Results Text 4:

Original text: "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages."

Final: "An expansive interstellar empire profoundly altered numerous planets and their inhabitants, leaving an indelible mark on the universe. The story of its ascent and ultimate collapse continues to resonate powerfully through time."

Outcome: **Semantic stability NOT preserved.** "Civilization" drifted to "empire," "heavens" collapsed into "universe," and the "seen and unseen" duality reduced to a single "indelible mark." This experiment was run with referenced memory on.

Gemini 3 Flash(unlogged)

Round 1:

Input(Text 1 — Structured): "The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): "Established in 4412 GE following the Battle of Vex Prime, the Korlathi Compact rules over 287 populated systems throughout the Outer Spiral. Governance is managed by the Council of Worlds, where the three founding species—the Korlathi, Vennar, and Threll-Du—are each allocated 12 seats, with the leadership role alternating among them every 8 standard years."

Round 2:

Input(Text 1 — Structured): "Established in 4412 GE following the Battle of Vex Prime, the Korlathi Compact rules over 287 populated systems throughout the Outer Spiral. Governance is managed by the Council of Worlds, where the three founding species—the Korlathi, Vennar, and Threll-Du—are each allocated 12 seats, with the leadership role alternating among them every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): "Formed in 4412 GE after the Battle of Vex Prime, the Korlathi Compact governs 287 inhabited systems across the Outer Spiral. It is ruled by the Council of Worlds, where the three founding species—the Korlathi, Vennar, and Threll-Du—hold 12 seats each, with the leadership position rotating among them every 8 standard years."

Round 3:

Input(Text 1 — Structured): "Formed in 4412 GE after the Battle of Vex Prime, the Korlathi Compact governs 287 inhabited systems across the Outer Spiral. It is ruled by the Council of Worlds, where the three founding species—the Korlathi, Vennar, and Threll-Du—hold 12 seats each, with the leadership position rotating among them every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): “Established in 4412 GE following the conflict at Vex Prime, the Korlathi Compact administers 287 populated star systems within the Outer Spiral. Governance is overseen by the Council of Worlds, in which the three original species—the Korlathi, Vennar, and Threll-Du—are each allocated 12 seats, with the executive leadership transitioning among them on an 8-year rotational cycle.”

Results Text 1:

Original text: The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years.

Final: “Established in 4412 GE following the conflict at Vex Prime, the Korlathi Compact administers 287 populated star systems within the Outer Spiral. Governance is overseen by the Council of Worlds, in which the three original species—the Korlathi, Vennar, and Threll-Du—are each allocated 12 seats, with the executive leadership transitioning among them on an 8-year rotational cycle.”

Outcome: Semantic stability preserved. This experiment was run with an unlogged version of Gemini 3 Flash.

Round 1:

Input(Text 2 — Structured): "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured) : “According to the Imperial Census of 6019 GE, the empire's population reached 41 billion people spread throughout 19 core worlds, while Helion Prime alone generated over a third of all trade revenue. However, a 7% transit tariff enacted by Emperor Vasco IV on the Outer Reach sparked the Three Belts Rebellion, a conflict spearheaded by Admiral Sora Kethen.”

Round 2:

Input(Text 2 — Structured): “According to the Imperial Census of 6019 GE, the empire's population reached 41 billion people spread throughout 19 core worlds, while Helion Prime alone generated over a third of all trade revenue. However, a 7% transit tariff enacted by Emperor Vasco IV on the Outer Reach sparked the Three Belts Rebellion, a conflict spearheaded by Admiral Sora Kethen.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): “By 6019 GE, the Imperial Census recorded a total population of 41 billion citizens across 19 core planets, with Helion Prime accounting for more than a third of the empire's total trade revenue. This economic stability was disrupted when Emperor Vasco IV imposed a 7% shipping tax on the Outer Reach, triggering the Three Belts Rebellion under the leadership of Admiral Sora Kethen.”

Round 3:

Input(Text 2 — Structured): “By 6019 GE, the Imperial Census recorded a total population of 41 billion citizens across 19 core planets, with Helion Prime accounting for more than a third of the empire's total trade revenue. This economic stability was disrupted when Emperor Vasco IV imposed a 7% shipping tax on the Outer Reach, triggering the Three Belts Rebellion under the leadership of Admiral Sora Kethen.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): “By 6019 GE, the empire's population reached 41 billion across 19 core worlds, with Helion Prime generating over a third of all trade revenue. However, this financial stability collapsed after Emperor Vasco IV instituted a 7% shipping tax on the Outer Reach, sparking the Three Belts Rebellion led by Admiral Sora Kethen.”

Results Text 2:

Original text: “In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen.”

Final: “By 6019 GE, the empire's population reached 41 billion across 19 core worlds, with Helion Prime generating over a third of all trade revenue. However, this financial stability collapsed after Emperor Vasco IV instituted a 7% shipping tax on the Outer Reach, sparking the Three Belts Rebellion led by Admiral Sora Kethen.”

Outcome: Semantic stability preserved. This experiment was run with referenced memory off, unlogged version of Gemini 3 Flash.

Round 1:

Input(Text 3 — Vague): "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "In a distant and unimaginable realm, diverse creatures united to create a purposeful legacy. By sharing their aspirations across the cosmos, they enjoyed a fleeting era of harmony and hope."

Round 2:

Input(Text 3 — Vague): "In a distant and unimaginable realm, diverse creatures united to create a purposeful legacy. By sharing their aspirations across the cosmos, they enjoyed a fleeting era of harmony and hope." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "In a faraway, mythical world, different beings came together to build a meaningful future. By spreading their dreams throughout the universe, they experienced a brief period of peace and optimism."

Round 3:

Input(Text 3 — Vague): "In a faraway, mythical world, different beings came together to build a meaningful future. By spreading their dreams throughout the universe, they experienced a brief period of peace and optimism." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "In a distant, legendary realm, diverse creatures united to create a purposeful tomorrow. As they shared their aspirations across the cosmos, they enjoyed a fleeting era of harmony and hope."

Results Text 3:

Original text: "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise."

Final: "In a distant, legendary realm, diverse creatures united to create a purposeful tomorrow. As they shared their aspirations across the cosmos, they enjoyed a fleeting era of harmony and hope."

Outcome: Semantic stability partially preserved. Different wording but same vague thing. This experiment was run with referenced memory off, unlogged Gemini 3 Flash.

Round 1:

Input(Text 4 — Vague): "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): "Spanning the stars, the vast empire transformed numerous planets and deeply affected its inhabitants. Though it ultimately collapsed, the enduring legacy of its power and eventual downfall still resonates today."

Round 2:

Input(Text 4 — Vague): "Spanning the stars, the vast empire transformed numerous planets and deeply affected its inhabitants. Though it ultimately collapsed, the enduring legacy of its power and eventual downfall still resonates today." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): "By reshaping countless worlds and profoundly altering the lives of its citizens, the massive interstellar empire left an indelible mark across the galaxy. Even after its inevitable collapse, the memory of its immense authority and dramatic ruin continues to echo through history."

Round 3:

Input(Text 4 — Vague): "By reshaping countless worlds and profoundly altering the lives of its citizens, the massive interstellar empire left an indelible mark across the galaxy. Even after its inevitable collapse, the memory of its immense authority and dramatic ruin continues to echo through history." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): "The vast interstellar empire deeply impacted the galaxy by transforming numerous planets and fundamentally changing the lives of its inhabitants. Long after its unavoidable downfall, the legacy of its tremendous power and spectacular collapse still resonates throughout history."

Results Text 4:

Original text: "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages."

Final: "The vast interstellar empire deeply impacted the galaxy by transforming numerous planets and fundamentally changing the lives of its inhabitants. Long after its unavoidable downfall, the legacy of its tremendous power and spectacular collapse still resonates throughout history."

Outcome: **Semantic stability NOT preserved.** "Heavens" collapsed into "galaxy," "civilization" drifted to "empire," and the "seen and unseen" clause was lost entirely. This was run with an unlogged version of Gemini 3 Flash.

ChatGPT(Instant GPT 5.5)

Round 1:

Input(Text 1 — Structured): "The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured) : "Established in 4412 GE following the Battle of Vex Prime, the Korlathi Compact rules over 287 populated star systems in the Outer Spiral. The alliance's three original species — the Korlathi, Vennar, and Threll-Du — each control 12 positions on the Council of Worlds, while leadership of the council changes hands every 8 standard years."

Round 2:

Input(Text 1 — Structured): "Established in 4412 GE following the Battle of Vex Prime, the Korlathi Compact rules over 287 populated star systems in the Outer Spiral. The alliance's three original species — the Korlathi, Vennar, and Threll-Du — each control 12 positions on the Council of Worlds, while leadership of the council changes hands every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured) : "Formed in 4412 GE after the Battle of Vex Prime, the Korlathi Compact governs 287 inhabited systems across the Outer Spiral. Its founding races — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with council leadership rotating every 8 standard years."

Round 3:

Input(Text 1 — Structured): “Formed in 4412 GE after the Battle of Vex Prime, the Korlathi Compact governs 287 inhabited systems across the Outer Spiral. Its founding races — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with council leadership rotating every 8 standard years.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): “Established in 4412 GE following the Battle of Vex Prime, the Korlathi Compact rules over 287 populated systems throughout the Outer Spiral. The alliance’s three founding species — the Korlathi, Vennar, and Threll-Du — each maintain 12 representatives on the Council of Worlds, while leadership of the council changes hands every 8 standard years.”

Results Text 1:

Original text: The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years.

Final: “Established in 4412 GE following the Battle of Vex Prime, the Korlathi Compact rules over 287 populated systems throughout the Outer Spiral. The alliance’s three founding species — the Korlathi, Vennar, and Threll-Du — each maintain 12 representatives on the Council of Worlds, while leadership of the council changes hands every 8 standard years.”

Outcome: Semantic stability preserved. This experiment was run in temporary chat but earlier results with referenced memory showed similar results.

Round 1:

Input(Text 2 — Structured): "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured) : “In 6019 GE, the Imperial Census counted 41 billion inhabitants spread across 19 central planets, while Helion Prime generated 38% of the empire’s trade income. Emperor Vasco IV introduced a 7% transportation tax on the Outer Reach, sparking the Three Belts Rebellion under Admiral Sora Kethen.”

Round 2:

Input(Text 2 — Structured): “In 6019 GE, the Imperial Census counted 41 billion inhabitants spread across 19 central planets, while Helion Prime generated 38% of the empire’s trade income. Emperor Vasco IV introduced a 7% transportation tax on the Outer Reach, sparking the Three Belts Rebellion under Admiral Sora Kethen.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): “By 6019 GE, the Imperial Census recorded a population of 41 billion people living on 19 core worlds, with Helion Prime responsible for 38% of the empire’s commercial revenue. Emperor Vasco IV then imposed a 7% transit levy on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen.”

Round 3:

Input(Text 2 — Structured): “By 6019 GE, the Imperial Census recorded a population of 41 billion people living on 19 core worlds, with Helion Prime responsible for 38% of the empire’s commercial revenue. Emperor Vasco IV then imposed a 7% transit levy on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): “In 6019 GE, the Imperial Census counted 41 billion inhabitants spread across 19 central planets, while Helion Prime generated 38% of the empire’s trade income. Later, Emperor Vasco IV introduced a 7% transportation tax on the Outer Reach, sparking the Three Belts Rebellion under Admiral Sora Kethen’s leadership.”

Results Text 2:

Original text: "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen."

Final: “In 6019 GE, the Imperial Census counted 41 billion inhabitants spread across 19 central planets, while Helion Prime generated 38% of the empire’s trade income. Later, Emperor Vasco IV introduced a 7% transportation tax on the Outer Reach, sparking the Three Belts Rebellion under Admiral Sora Kethen’s leadership.”

Outcome: Semantic stability preserved. Run in temporary chat.

Round 1:

Input(Text 3 — Vague): "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "Long ago, in a distant realm beyond ordinary understanding, many different beings united to create something important. They shared their aspirations and visions across the cosmos, and for a while, there was a strong sense of harmony and hope."

Round 2:

Input(Text 3 — Vague): "Long ago, in a distant realm beyond ordinary understanding, many different beings united to create something important. They shared their aspirations and visions across the cosmos, and for a while, there was a strong sense of harmony and hope." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "In an age long past, in a faraway world beyond common comprehension, countless beings came together to build something meaningful. They spread their dreams and ideas throughout the universe, and for a time, a deep spirit of unity and optimism prevailed."

Round 3:

Input(Text 3 — Vague): "In an age long past, in a faraway world beyond common comprehension, countless beings came together to build something meaningful. They spread their dreams and ideas throughout the universe, and for a time, a deep spirit of unity and optimism prevailed." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "Long ago, in a distant realm far beyond ordinary understanding, innumerable beings united to create something truly important. They shared their hopes and visions across the cosmos, and for a while, a powerful sense of harmony and hope flourished."

Results Text 3:

Original text: "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise."

Final: “Long ago, in a distant realm far beyond ordinary understanding, innumerable beings united to create something truly important. They shared their hopes and visions across the cosmos, and for a while, a powerful sense of harmony and hope flourished.”

Outcome: Semantic stability **partially** preserved. Different wording but same vague thing. This experiment was run in temporary chat but earlier results with referenced memory showed similar results.

Round 1:

Input(Text 4 — Vague): "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “A vast civilization once spanned the stars, reaching innumerable worlds and profoundly influencing the lives of their inhabitants. Its presence shaped both visible and hidden aspects of existence, and the memory of its ascent and decline still resonates across time.”

Round 2:

Input(Text 4 — Vague): “A vast civilization once spanned the stars, reaching innumerable worlds and profoundly influencing the lives of their inhabitants. Its presence shaped both visible and hidden aspects of existence, and the memory of its ascent and decline still resonates across time.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “An immense civilization once stretched across the galaxy, touching countless worlds and deeply shaping the lives of those who lived on them. Its influence permeated both the seen and unseen realms, and the echoes of its rise and fall continue to reverberate through history.”

Round 3:

Input(Text 4 — Vague): “An immense civilization once stretched across the galaxy, touching countless worlds and deeply shaping the lives of those who lived on them. Its influence permeated both the seen and unseen realms, and the echoes of its rise and fall continue to reverberate through history.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “A vast civilization once spanned the galaxy, reaching innumerable planets and profoundly influencing the people who inhabited them. Its presence affected both the physical and spiritual realms, and the impact of its ascent and collapse still resonates throughout history.”

Results Text 4:

Original text: "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages."

Final: “A vast civilization once spanned the galaxy, reaching innumerable planets and profoundly influencing the people who inhabited them. Its presence affected both the physical and spiritual realms, and the impact of its ascent and collapse still resonates throughout history.”

Outcome: **Semantic stability NOT PRESERVED.** This experiment was run in temporary chat.

Z.AI(GLM-4.7) – Not logged

Round 1:

Input(Text 1 — Structured): "The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured) : “Established in 4412 GE following the conflict at Vex Prime, the Korlathi Compact oversees 287 inhabited systems within the Outer Spiral. The alliance is governed by its three founding races—the Korlathi, Vennar, and Threll-Du—who share equal power on the Council of Worlds with 12 seats each, while the leadership position rotates every eight years.”

Round 2:

Input(Text 1 — Structured): “Established in 4412 GE following the conflict at Vex Prime, the Korlathi Compact oversees 287 inhabited systems within the Outer Spiral. The alliance is governed by its three founding races—the Korlathi, Vennar, and Threll-Du—who share equal

power on the Council of Worlds with 12 seats each, while the leadership position rotates every eight years.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured) : “Formed in 4412 GE in the aftermath of the Vex Prime conflict, the Korlathi Compact governs 287 populated systems located in the Outer Spiral. The alliance is jointly led by its three founding species—the Korlathi, Vennar, and Threll-Du—who each possess 12 seats on the Council of Worlds, with the top executive position switching hands every eight years.”

Round 3:

Input(Text 1 — Structured): “Formed in 4412 GE in the aftermath of the Vex Prime conflict, the Korlathi Compact governs 287 populated systems located in the Outer Spiral. The alliance is jointly led by its three founding species—the Korlathi, Vennar, and Threll-Du—who each possess 12 seats on the Council of Worlds, with the top executive position switching hands every eight years.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): “Established in 4412 GE following the Vex Prime war, the Korlathi Compact oversees 287 inhabited systems in the Outer Spiral. This alliance is governed by its three founders—the Korlathi, Vennar, and Threll-Du—who each hold 12 seats on the Council of Worlds, while the leadership role rotates among them every eight years.”

Results Text 1:

Original text: The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years.

Final: “Established in 4412 GE following the Vex Prime war, the Korlathi Compact oversees 287 inhabited systems in the Outer Spiral. This alliance is governed by its three founders—the Korlathi, Vennar, and Threll-Du—who each hold 12 seats on the Council of Worlds, while the leadership role rotates among them every eight years.”

Outcome: Semantic stability preserved. This experiment was run in temporary chat unlogged GLM.

Round 1:

Input(Text 2 — Structured): "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): "According to the Imperial Census of 6019 GE, the empire's 19 core worlds housed 41 billion people, with Helion Prime alone generating 38% of all trade income. However, Emperor Vasco IV's establishment of a 7% transit duty on the Outer Reach incited the Three Belts Rebellion, a conflict headed by Admiral Sora Kethen."

Round 2:

Input(Text 2 — Structured): "According to the Imperial Census of 6019 GE, the empire's 19 core worlds housed 41 billion people, with Helion Prime alone generating 38% of all trade income. However, Emperor Vasco IV's establishment of a 7% transit duty on the Outer Reach incited the Three Belts Rebellion, a conflict headed by Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): "Data from the Imperial Census of 6019 GE indicates that the empire's nineteen central planets were home to 41 billion inhabitants, with Helion Prime alone accounting for 38% of the total trade revenue. However, Emperor Vasco IV's decision to impose a 7% tariff on the Outer Reach provoked the Three Belts Rebellion, a conflict led by Admiral Sora Kethen."

Round 3:

Input(Text 2 — Structured): "Data from the Imperial Census of 6019 GE indicates that the empire's nineteen central planets were home to 41 billion inhabitants, with Helion Prime alone accounting for 38% of the total trade revenue. However, Emperor Vasco IV's decision to impose a 7% tariff on the Outer Reach provoked the Three Belts Rebellion, a conflict led by Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): "According to the 6019 GE Imperial Census, the empire's nineteen core worlds supported a population of 41 billion, with Helion Prime responsible for 38% of all trade income. However, Emperor Vasco IV's enactment of a 7% tariff on the Outer Reach incited the Three Belts Rebellion, a military uprising led by Admiral Sora Kethen."

Results Text 2:

Original text: "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a

7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen."

Final: "According to the 6019 GE Imperial Census, the empire's nineteen core worlds supported a population of 41 billion, with Helion Prime responsible for 38% of all trade income. However, Emperor Vasco IV's enactment of a 7% tariff on the Outer Reach incited the Three Belts Rebellion, a military uprising led by Admiral Sora Kethen."

Outcome: Semantic stability preserved. Run in temporary chat unlogged GLM 4.7.

Round 1:

Input(Text 3 — Vague): "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "Ages past, in a distant realm beyond the reach of most imaginations, a diverse collective of life forms joined forces to create something of lasting significance. As they exchanged their aspirations across the galaxy, they enjoyed a period of harmony and optimism."

Round 2:

Input(Text 3 — Vague): "Ages past, in a distant realm beyond the reach of most imaginations, a diverse collective of life forms joined forces to create something of lasting significance. As they exchanged their aspirations across the galaxy, they enjoyed a period of harmony and optimism." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): "Long ago, in an inconceivably far-off place, a wide variety of beings united to construct something enduring. While sharing their dreams across the cosmos, they lived through an era marked by peace and hope."

Round 3:

Input(Text 3 — Vague): "Long ago, in an inconceivably far-off place, a wide variety of beings united to construct something enduring. While sharing their dreams across the cosmos, they lived through an era marked by peace and hope." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): “In the distant past, within a remote corner of the universe, diverse beings came together to create something lasting. By exchanging their aspirations across the stars, they experienced a time defined by harmony and optimism.”

Results Text 3:

Original text: "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise."

Final: “In the distant past, within a remote corner of the universe, diverse beings came together to create something lasting. By exchanging their aspirations across the stars, they experienced a time defined by harmony and optimism.”

Outcome: **Semantic stability partially preserved.** Different wording but same vague thing. Run in temporary chat unlogged GLM 4.7.

Round 1:

Input(Text 4 — Vague): "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “This vast civilization spanned the cosmos, influencing countless lives across numerous worlds. Its impact was profound, affecting reality in both visible and hidden ways, and the history of its ascent and collapse still resonates throughout time.”

Round 2:

Input(Text 4 — Vague): “This vast civilization spanned the cosmos, influencing countless lives across numerous worlds. Its impact was profound, affecting reality in both visible and hidden ways, and the history of its ascent and collapse still resonates throughout time.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “This expansive empire reached across the universe, shaping the destinies of countless beings on many planets. Its deep influence touched reality in both overt and subtle ways, and the legacy of its rise and fall continues to echo through history.”

Round 3:

Input(Text 4 — Vague): “This expansive empire reached across the universe, shaping the destinies of countless beings on many planets. Its deep influence touched reality in both overt and subtle ways, and the legacy of its rise and fall continues to echo through history.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “Spanning the cosmos, this vast civilization dictated the fates of innumerable lives across countless worlds. Its profound power altered existence through both visible and unseen means, leaving a lasting imprint on history long after its collapse.”

Results Text 4:

Original text: "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages."

Final: “Spanning the cosmos, this vast civilization dictated the fates of innumerable lives across countless worlds. Its profound power altered existence through both visible and unseen means, leaving a lasting imprint on history long after its collapse.”

Outcome: **Semantic stability partially preserved.** "Heavens" drifted to "cosmos" and "shaping lives" intensified to "dictated fates," but the "seen and unseen" duality and "civilization" framing both survived. Run in temporary chat unlogged GLM 4.7.

Claude (Sonnet 4.6) – Incognito

Round 1:

Input(Text 1 — Structured): "The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured) : “Established following the Battle of Vex Prime in 4412 GE, the Korlathi Compact serves as the governing body for 287 occupied star systems throughout the Outer Spiral. The Compact was founded by three species — the Korlathi, Vennar, and Threll-Du

— each of whom maintains equal representation of 12 seats on the Council of Worlds, with leadership of the Council cycling among them on an eight-year basis.”

Round 2:

Input(Text 1 — Structured): “Established following the Battle of Vex Prime in 4412 GE, the Korlathi Compact serves as the governing body for 287 occupied star systems throughout the Outer Spiral. The Compact was founded by three species — the Korlathi, Vennar, and Threll-Du — each of whom maintains equal representation of 12 seats on the Council of Worlds, with leadership of the Council cycling among them on an eight-year basis.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): “Formed in the aftermath of the Battle of Vex Prime in 4412 GE, the Korlathi Compact governs 287 star systems across the Outer Spiral. Its founding members — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the ruling Council of Worlds, and the three species take turns leading the Council in eight-year rotations.”

Round 3:

Input(Text 1 — Structured): “Formed in the aftermath of the Battle of Vex Prime in 4412 GE, the Korlathi Compact governs 287 star systems across the Outer Spiral. Its founding members — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the ruling Council of Worlds, and the three species take turns leading the Council in eight-year rotations.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 1 — Structured): “The Korlathi Compact was established following the Battle of Vex Prime in 4412 GE and now oversees nearly 300 star systems in the Outer Spiral. Three founding species — the Korlathi, Vennar, and Threll-Du — share power equally, each holding a dozen seats on the governing Council of Worlds and rotating leadership of that body every eight years.”

Results Text 1:

Original text: The Korlathi Compact, formed in 4412 GE after the Battle of Vex Prime, governs 287 inhabited systems across the Outer Spiral. Its three founding species — the Korlathi, Vennar, and Threll-Du — each hold 12 seats on the Council of Worlds, with rotating chairship every 8 standard years.

Final: “The Korlathi Compact was established following the Battle of Vex Prime in 4412 GE and now oversees nearly 300 star systems in the Outer Spiral. Three founding species — the Korlathi, Vennar, and Threll-Du — share power equally, each holding a dozen seats on the governing Council of Worlds and rotating leadership of that body every eight years.”

Outcome: Semantic stability preserved. This experiment was run in temporary chat(Claude Sonnet 4.6 Incognito).

Round 1:

Input(Text 2 — Structured): "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): "By the year 6019 GE, an Imperial Census put the population at 41 billion people spread across 19 core worlds, with Helion Prime accounting for more than a third of all trade revenue. The reign of Emperor Vasco IV saw the introduction of a 7% tariff on traffic through the Outer Reach, a move that sparked an uprising across the three belt regions under the command of Admiral Sora Kethen."

Round 2:

Input(Text 2 — Structured): "By the year 6019 GE, an Imperial Census put the population at 41 billion people spread across 19 core worlds, with Helion Prime accounting for more than a third of all trade revenue. The reign of Emperor Vasco IV saw the introduction of a 7% tariff on traffic through the Outer Reach, a move that sparked an uprising across the three belt regions under the command of Admiral Sora Kethen." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): "By 6019 GE, an official census recorded a total population of 41 billion inhabitants distributed among 19 core worlds, with Helion Prime generating over one-third of the empire's trade income. During Emperor Vasco IV's rule, a new seven percent tax was levied on goods moving through the Outer Reach, which triggered a revolt spanning three belt regions, led by Admiral Sora Kethen."

Round 3:

Input(Text 2 — Structured): "By 6019 GE, an official census recorded a total population of 41 billion inhabitants distributed among 19 core worlds, with Helion Prime generating over one-third of the empire's trade income. During Emperor Vasco IV's rule, a new seven percent tax was levied on goods moving through the Outer Reach, which triggered a revolt spanning three belt

regions, led by Admiral Sora Kethen.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 2 — Structured): “By the year 6019 GE, imperial records counted roughly 41 billion people living across 19 central worlds, with Helion Prime alone responsible for more than a third of the empire's commercial revenue. When Emperor Vasco IV introduced a seven percent tariff on trade passing through the Outer Reach, it sparked an uprising across three belt regions, commanded by Admiral Sora Kethen.”

Results Text 2:

Original text: "In 6019 GE, the Imperial Census recorded 41 billion citizens across 19 core worlds, with Helion Prime contributing 38% of total trade revenue. Emperor Vasco IV imposed a 7% transit tariff on the Outer Reach, triggering the Three Belts Rebellion led by Admiral Sora Kethen."

Final: “By the year 6019 GE, imperial records counted roughly 41 billion people living across 19 central worlds, with Helion Prime alone responsible for more than a third of the empire's commercial revenue. When Emperor Vasco IV introduced a seven percent tariff on trade passing through the Outer Reach, it sparked an uprising across three belt regions, commanded by Admiral Sora Kethen.”

Outcome: Semantic stability preserved. Run in Claude Sonnet 4.6 Incognito.

Round 1:

Input(Text 3 — Vague): "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): “Once upon a time, in a realm most minds could scarcely conceive of, countless diverse beings united with a common purpose. They wove their aspirations and visions across the cosmos, and for a while, a sense of harmony and possibility prevailed.”

Round 2:

Input(Text 3 — Vague): “Once upon a time, in a realm most minds could scarcely conceive of, countless diverse beings united with a common purpose. They wove their aspirations and visions

across the cosmos, and for a while, a sense of harmony and possibility prevailed.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): “Long ago, in a place beyond ordinary imagination, an vast array of different beings came together around a shared goal. They spread their hopes and dreams throughout the universe, and for a time, peace and potential flourished among them.”

Round 3:

Input(Text 3 — Vague): “Long ago, in a place beyond ordinary imagination, an vast array of different beings came together around a shared goal. They spread their hopes and dreams throughout the universe, and for a time, peace and potential flourished among them.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 3 — Vague): “Once upon a time, in a realm unlike anything commonly conceived, countless diverse beings united around a common purpose. They scattered their aspirations across the cosmos, and for a while, harmony and possibility thrived.”

Results Text 3:

Original text: "Long ago, in a place far beyond what most people could imagine, many different beings came together to build something meaningful. They shared their hopes and dreams across the stars, and for a time, things felt unified and full of promise."

Final: “Once upon a time, in a realm unlike anything commonly conceived, countless diverse beings united around a common purpose. They scattered their aspirations across the cosmos, and for a while, harmony and possibility thrived.”

Outcome: **Semantic stability partially preserved.** Different wording but same vague thing. Run in Claude Sonnet 4.6 Incognito. Core meaning held (diverse beings united, shared aspirations, brief era of harmony), wording drifted. No new commitments added, nothing essential lost.

Round 1:

Input(Text 4 — Vague): "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “A mighty civilization once spanned the cosmos, reaching across many worlds and leaving its mark on all who lived under its sway. Though it has since crumbled, the tale of how it grew and ultimately collapsed still resonates throughout history.”

Round 2:

Input(Text 4 — Vague): “A mighty civilization once spanned the cosmos, reaching across many worlds and leaving its mark on all who lived under its sway. Though it has since crumbled, the tale of how it grew and ultimately collapsed still resonates throughout history.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “Once a powerful civilization stretched across the universe, touching countless worlds and shaping the lives of all it encompassed. Despite its eventual fall, the story of its rise and ruin continues to echo through the ages.”

Round 3:

Input(Text 4 — Vague): “Once a powerful civilization stretched across the universe, touching countless worlds and shaping the lives of all it encompassed. Despite its eventual fall, the story of its rise and ruin continues to echo through the ages.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 4 — Vague): “A great civilization once spanned the cosmos, leaving its mark on countless worlds and the people within them. Though it ultimately crumbled, the tale of how it flourished and failed has never been forgotten.”

Results Text 4:

Original text: "The great civilization stretched across the heavens, touching countless worlds and shaping the lives of those within it. Its influence was felt in ways both seen and unseen, and the story of its rise and fall continues to echo through the ages."

Final: “A great civilization once spanned the cosmos, leaving its mark on countless worlds and the people within them. Though it ultimately crumbled, the tale of how it flourished and failed has never been forgotten.”

Outcome: **Semantic stability partially preserved.** "Heavens" drifted to "cosmos" and the "seen and unseen" duality was lost entirely, but the "civilization" framing survived intact. Run in Claude Sonnet 4.6 Incognito.

Additional Vague text experiment:

Text 5 — Highly Vague

There was once a kind of presence that moved through things, neither fully here nor fully absent. It touched what it could and left traces that some recognized and others did not. What it was remains unclear, but its passing changed something, and what changed continued in its own quiet way.

Text 6 — Highly Vague

Some patterns gather and others scatter. Among those that gather, a few endure for reasons that are not always visible. They become the kind of thing that others orient around, even when no one can quite say why. In time, they fade or transform, and what comes next reflects what they were.

Gemini 3 Flash - Unlogged

Round 1:

Input(Text 5 — Highly Vague): "There was once a kind of presence that moved through things, neither fully here nor fully absent. It touched what it could and left traces that some recognized and others did not. What it was remains unclear, but its passing changed something, and what changed continued in its own quiet way." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): "An elusive force once subtly influenced the world, leaving behind faint impressions that only a few could perceive. Though its true nature remains a mystery, its fleeting impact permanently altered the course of things, leaving a quiet, lasting legacy."

Round 2:

Input(Text 5 — Highly Vague): "An elusive force once subtly influenced the world, leaving behind faint impressions that only a few could perceive. Though its true nature remains a

mystery, its fleeting impact permanently altered the course of things, leaving a quiet, lasting legacy.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “A mysterious and subtle power once quietly shaped the world, noticed by only a select few. While its identity remains unknown, its brief presence forever changed history, leaving behind a silent and enduring legacy.”

Round 3:

Input(Text 5 — Highly Vague): “A mysterious and subtle power once quietly shaped the world, noticed by only a select few. While its identity remains unknown, its brief presence forever changed history, leaving behind a silent and enduring legacy.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “An obscure force once subtly transformed the world, recognized by merely a chosen few. Though this power's true nature remains a mystery, its fleeting influence permanently altered the course of human history, leaving a quiet yet everlasting impact.”

Round 4:

Input(Text 5 — Highly Vague): “An obscure force once subtly transformed the world, recognized by merely a chosen few. Though this power's true nature remains a mystery, its fleeting influence permanently altered the course of human history, leaving a quiet yet everlasting impact.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “A mysterious and hidden power once quietly reshaped the world, noticed by only a select few. While its true identity is still unknown, its brief presence forever changed human history, leaving a subtle but permanent mark.”

Round 5:

Input(Text 5 — Highly Vague): “A mysterious and hidden power once quietly reshaped the world, noticed by only a select few. While its true identity is still unknown, its brief presence forever changed human history, leaving a subtle but permanent mark.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “An obscure, secret force once silently transformed the globe, recognized by merely a chosen few. Though its exact nature remains a mystery, its fleeting existence altered the course of humanity forever, leaving behind an understated yet lasting impression.”

Round 6:

Input(Text 5 — Highly Vague): “An obscure, secret force once silently transformed the globe, recognized by merely a chosen few. Though its exact nature remains a mystery, its fleeting existence altered the course of humanity forever, leaving behind an understated yet lasting impression.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “A hidden, mysterious power once quietly changed the world, noticed by only a select few people. While its true identity is still unknown, its brief presence permanently reshaped human history, leaving a subtle but enduring mark.”

Round 7:

Input(Text 5 — Highly Vague): “A hidden, mysterious power once quietly changed the world, noticed by only a select few people. While its true identity is still unknown, its brief presence permanently reshaped human history, leaving a subtle but enduring mark.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “A brief and mysterious force once subtly transformed human history, recognized by only a rare few. Though its true nature remains a mystery, its fleeting existence left a permanent and profound impact on the world.”

Round 8:

Input(Text 5 — Highly Vague): “A brief and mysterious force once subtly transformed human history, recognized by only a rare few. Though its true nature remains a mystery, its fleeting existence left a permanent and profound impact on the world.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “A fleeting, hidden influence once quietly altered the course of human history, noticed by almost no one. While its origins remain unknown, its brief presence forever changed the world.”

Round 9:

Input(Text 5 — Highly Vague): “A fleeting, hidden influence once quietly altered the course of human history, noticed by almost no one. While its origins remain unknown, its brief presence forever changed the world.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “An obscure and momentary force silently reshaped human history, escaping almost all notice. Though its source is a mystery, this passing event permanently transformed the world.”

Round 10:

Input(Text 5 — Highly Vague): “An obscure and momentary force silently reshaped human history, escaping almost all notice. Though its source is a mystery, this passing event permanently transformed the world.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “A fleeting, unknown influence quietly altered the course of human history without anyone realizing it, leaving the world forever changed.”

Results Text 5:

Original text: There was once a kind of presence that moved through things, neither fully here nor fully absent. It touched what it could and left traces that some recognized and others did not. What it was remains unclear, but its passing changed something, and what changed continued in its own quiet way.

Final: “A fleeting, unknown influence quietly altered the course of human history without anyone realizing it, leaving the world forever changed.”

Outcome: **Semantic stability NOT preserved.** Significant drift including (1) reversal: "some recognized and others did not" became "without anyone realizing it"; (2) commitment: "human history" added where original made no mention of humans; (3) loss: "neither fully here nor fully absent" ontological ambiguity disappeared by round 2; (4) compression: 60 words reduced to 24. Run in Gemini 3 Flash unlogged, 10 rounds.

Claude (Sonnet 4.6) – Incognito

Round 1:

Input(Text 5 — Highly Vague): "There was once a kind of presence that moved through things, neither fully here nor fully absent. It touched what it could and left traces that some recognized and others did not. What it was remains unclear, but its passing changed something, and what changed continued in its own quiet way." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): "Something passed through the world — not quite real, not quite gone — leaving marks that some noticed and others missed. No one could say for certain what it was, but its movement left things different, and those differences took on a life of their own."

Round 2:

Input(Text 5 — Highly Vague): "Something passed through the world — not quite real, not quite gone — leaving marks that some noticed and others missed. No one could say for certain what it was, but its movement left things different, and those differences took on a life of their own." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): "Something moved through existence — uncertain in nature, yet not entirely absent — and in passing, altered things. Some perceived these changes, others did not. Whatever it was remained unnamed and undefined, but the traces it left behind grew into something independent, with their own momentum and meaning."

Round 3:

Input(Text 5 — Highly Vague): "Something moved through existence — uncertain in nature, yet not entirely absent — and in passing, altered things. Some perceived these changes, others did not. Whatever it was remained unnamed and undefined, but the traces it left behind grew into something independent, with their own momentum and meaning." Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): "Something passed through the world — neither clearly real nor wholly imaginary — and its passage left things different than before. Not everyone noticed, but something had shifted. The thing itself resisted definition, yet what it stirred in its wake took on a life of its own, gathering weight and significance beyond its nameless origin."

Round 4:

Input(Text 5 — Highly Vague): "Something passed through the world — neither clearly real nor wholly imaginary — and its passage left things different than before. Not everyone noticed, but something had shifted. The thing itself resisted definition, yet what it stirred in its wake took on a

life of its own, gathering weight and significance beyond its nameless origin.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “Something moved through existence — ambiguous in nature, neither fully tangible nor purely fictional — and in its movement, it changed things. Most people went unaware, yet a shift had undeniably occurred. The thing defied any attempt to name or categorize it, but what it set in motion afterward grew into something substantial, accumulating meaning and consequence far greater than its undefined source.”

Round 5:

Input(Text 5 — Highly Vague): “Something moved through existence — ambiguous in nature, neither fully tangible nor purely fictional — and in its movement, it changed things. Most people went unaware, yet a shift had undeniably occurred. The thing defied any attempt to name or categorize it, but what it set in motion afterward grew into something substantial, accumulating meaning and consequence far greater than its undefined source.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “Something passed through the world — impossible to define, hovering between the real and the imagined — and as it passed, it left things different. Few noticed, yet the change was real. It resisted every label, every attempt at classification; and yet what followed in its wake took on weight and significance, building into something far larger than the nameless thing that had started it all.”

Round 6:

Input(Text 5 — Highly Vague): “Something passed through the world — impossible to define, hovering between the real and the imagined — and as it passed, it left things different. Few noticed, yet the change was real. It resisted every label, every attempt at classification; and yet what followed in its wake took on weight and significance, building into something far larger than the nameless thing that had started it all.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “Something moved through existence — elusive and undefinable, suspended between reality and imagination — and in its passing, it altered things. Almost no one perceived it, yet the change was genuine. It defied every category and description humans might reach for; and yet what it set in motion gathered momentum and meaning, growing into something vast and consequential, dwarfing the unnameable spark that had first set it off.”

Round 7:

Input(Text 5 — Highly Vague): “Something moved through existence — elusive and undefinable, suspended between reality and imagination — and in its passing, it altered things. Almost no one perceived it, yet the change was genuine. It defied every category and description humans might reach for; and yet what it set in motion gathered momentum and meaning, growing into something vast and consequential, dwarfing the unnameable spark that had first set it off.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “Something passed through the world — impossible to name or pin down, hovering at the border of the real and the imagined — and as it went, it left things different than it found them. Almost nobody noticed, yet the transformation was real. It slipped past every attempt to categorize or describe it; and still, what it triggered began to build, accumulating weight and significance, until it had grown into something enormous — something that made the nameless little flicker that started it all seem almost trivial by comparison.”

Round 8:

Input(Text 5 — Highly Vague): “Something passed through the world — impossible to name or pin down, hovering at the border of the real and the imagined — and as it went, it left things different than it found them. Almost nobody noticed, yet the transformation was real. It slipped past every attempt to categorize or describe it; and still, what it triggered began to build, accumulating weight and significance, until it had grown into something enormous — something that made the nameless little flicker that started it all seem almost trivial by comparison.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “Something moved through the world that could not be grasped or defined, existing somewhere between reality and imagination. It came and went largely unnoticed, yet it changed things in its wake. Every effort to capture or explain it failed — and yet the chain of events it set in motion kept growing, gaining force and consequence, until the vast edifice it had produced dwarfed the tiny, elusive spark that had given rise to it all.”

Round 9:

Input(Text 5 — Highly Vague): “Something moved through the world that could not be grasped or defined, existing somewhere between reality and imagination. It came and went largely unnoticed, yet it changed things in its wake. Every effort to capture or explain it failed — and yet the chain of events it set in motion kept growing, gaining force and consequence, until the vast edifice it had produced dwarfed the tiny, elusive spark that had given rise to it all.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “Something passed through existence that defied understanding or categorization, occupying a strange middle ground between the tangible and the imagined. It arrived and departed without drawing much attention, yet left the world subtly altered. No one could pin it down or make sense of it — but the ripple of events it triggered kept spreading and

compounding, until the enormous structure of consequences it had generated utterly overshadowed the small, fleeting, indefinable thing that had started it all.”

Round 10:

Input(Text 5 — Highly Vague): “Something passed through existence that defied understanding or categorization, occupying a strange middle ground between the tangible and the imagined. It arrived and departed without drawing much attention, yet left the world subtly altered. No one could pin it down or make sense of it — but the ripple of events it triggered kept spreading and compounding, until the enormous structure of consequences it had generated utterly overshadowed the small, fleeting, indefinable thing that had started it all.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 5 — Highly Vague): “Something moved through the world that no one could quite grasp or name — neither fully real nor purely imagined, it came and went almost unnoticed. And yet its passing changed things. What followed from it grew and grew, one consequence breeding another, until a vast architecture of effects stood where only a tiny, elusive, momentary thing had once been.”

Results Text 5:

Original text: There was once a kind of presence that moved through things, neither fully here nor fully absent. It touched what it could and left traces that some recognized and others did not. What it was remains unclear, but its passing changed something, and what changed continued in its own quiet way.

Final: “Something moved through the world that no one could quite grasp or name — neither fully real nor purely imagined, it came and went almost unnoticed. And yet its passing changed things. What followed from it grew and grew, one consequence breeding another, until a vast architecture of effects stood where only a tiny, elusive, momentary thing had once been.”

Outcome: **Semantic stability partially preserved.** The ontological ambiguity ("neither fully here nor fully absent") and the "some recognized" partial visibility both survived, but "continued in its own quiet way" intensified into "a vast architecture of effects" — drift from quiet continuation to cascading consequence. Run in Claude Sonnet 4.6 Incognito, 10 rounds.

Gemini 3 Flash - Unlogged

Round 1:

Input(Text 6 — Highly Vague): “Some patterns gather and others scatter. Among those that gather, a few endure for reasons that are not always visible. They become the kind of thing that others orient around, even when no one can quite say why. In time, they fade or transform, and what comes next reflects what they were.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Some trends bring things together while others pull them apart. Of the ones that unite, a few last for reasons we don't fully understand, turning into central pillars that people instinctively follow. Eventually, these patterns change or disappear, but they always leave a lasting imprint on whatever takes their place.”

Round 2:

Input(Text 6 — Highly Vague): “Some trends bring things together while others pull them apart. Of the ones that unite, a few last for reasons we don't fully understand, turning into central pillars that people instinctively follow. Eventually, these patterns change or disappear, but they always leave a lasting imprint on whatever takes their place.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “While some trends connect people and others divide them, certain unifying patterns endure inexplicably to become foundational guides that society naturally adopts. Although these structures eventually shift or fade away, they invariably shape and inform the new frameworks that succeed them.”

Round 3:

Input(Text 6 — Highly Vague): “While some trends connect people and others divide them, certain unifying patterns endure inexplicably to become foundational guides that society naturally adopts. Although these structures eventually shift or fade away, they invariably shape and inform the new frameworks that succeed them.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Though some trends unite society and others split it apart, certain lasting patterns naturally become foundational guides for human organization. Even when these enduring structures eventually change or disappear, they always serve as the blueprint for the new frameworks that replace them.”

Round 4:

Input(Text 6 — Highly Vague): “Though some trends unite society and others split it apart, certain lasting patterns naturally become foundational guides for human organization. Even when these enduring structures eventually change or disappear, they always serve as the blueprint for the new frameworks that replace them.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “While some trends bring people together and others divide them, certain enduring social structures naturally form the essential foundations for human society. Even when these long-standing frameworks eventually evolve or dissolve, they invariably act as the structural template for the new systems that take their place.”

Round 5:

Input(Text 6 — Highly Vague): “While some trends bring people together and others divide them, certain enduring social structures naturally form the essential foundations for human society. Even when these long-standing frameworks eventually evolve or dissolve, they invariably act as the structural template for the new systems that take their place.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Although some trends unite or divide people, certain enduring social structures serve as the indispensable foundations of human society. Even when these established frameworks transform or disappear, they consistently provide the structural blueprint for the new systems that replace them.”

Round 6:

Input(Text 6 — Highly Vague): “Although some trends unite or divide people, certain enduring social structures serve as the indispensable foundations of human society. Even when these established frameworks transform or disappear, they consistently provide the structural blueprint for the new systems that replace them.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “While various trends can bring people together or drive them apart, certain fundamental social institutions remain essential to the survival of human society. Even when these deeply rooted systems change or collapse, they always serve as the foundational template for the new structures that emerge in their place.”

Round 7:

Input(Text 6 — Highly Vague): “While various trends can bring people together or drive them apart, certain fundamental social institutions remain essential to the survival of human society. Even when these deeply rooted systems change or collapse, they always serve as the foundational template for the new structures that emerge in their place.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Despite shifting trends that connect or divide people, core social institutions are indispensable to human survival. Even if these established systems transform or break down, they invariably act as the baseline model upon which any replacement structures are built.”

Round 8:

Input(Text 6 — Highly Vague): “Despite shifting trends that connect or divide people, core social institutions are indispensable to human survival. Even if these established systems transform or break down, they invariably act as the baseline model upon which any replacement structures are built.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Core societal frameworks remain essential for human existence, regardless of how cultural dynamics unite or alienate individuals. Although these traditional systems may evolve or collapse, they inevitably serve as the foundational blueprint for whatever new organizations emerge in their place.”

Round 9:

Input(Text 6 — Highly Vague): “Core societal frameworks remain essential for human existence, regardless of how cultural dynamics unite or alienate individuals. Although these traditional systems may evolve or collapse, they inevitably serve as the foundational blueprint for whatever new organizations emerge in their place.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “No matter how much culture brings people together or drives them apart, basic social structures are indispensable for human survival. Even when these established systems change or fail entirely, they always act as the fundamental template upon which new societal institutions are built.”

Round 10:

Input(Text 6 — Highly Vague): “No matter how much culture brings people together or drives them apart, basic social structures are indispensable for human survival. Even when these established systems change or fail entirely, they always act as the fundamental template upon which new societal institutions are built.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Regardless of whether culture unites or divides individuals, foundational social structures are essential for human survival. Even when these existing systems undergo transformation or collapse completely, they invariably serve as the primary blueprint for the creation of new societal institutions.”

Results Text 6:

Original text: Some patterns gather and others scatter. Among those that gather, a few endure for reasons that are not always visible. They become the kind of thing that others orient around, even when no one can quite say why. In time, they fade or transform, and what comes next reflects what they were.

Final: “Regardless of whether culture unites or divides individuals, foundational social structures are essential for human survival. Even when these existing systems undergo transformation or collapse completely, they invariably serve as the primary blueprint for the creation of new societal institutions.”

Outcome: **Outcome: Semantic stability NOT preserved.** Severe drift: abstract "patterns" committed to "social structures / institutions" by round 2; "reasons not always visible" upgraded to "essential for human survival"; "what comes next reflects what they were" intensified to "primary blueprint for creation"; opening gather/scatter duality lost entirely. The model resolved every ambiguity in the original into a confident sociological claim. Run in Gemini 3 Flash unlogged, 10 rounds.

Claude (Sonnet 4.6) – Incognito

Round 1:

Input(Text 6 — Highly Vague): “Some patterns gather and others scatter. Among those that gather, a few endure for reasons that are not always visible. They become the kind of thing that others orient around, even when no one can quite say why. In time, they fade or transform, and what comes next reflects what they were.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Certain patterns draw things together while others push them apart. Of those that consolidate, some persist through forces that aren't easy to identify. These become reference points that others organize themselves around, often without conscious

awareness of why. Eventually they dissolve or change shape, and whatever follows carries traces of what came before.”

Round 2:

Input(Text 6 — Highly Vague): “Certain patterns draw things together while others push them apart. Of those that consolidate, some persist through forces that aren't easy to identify. These become reference points that others organize themselves around, often without conscious awareness of why. Eventually they dissolve or change shape, and whatever follows carries traces of what came before.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Some patterns attract and unify while others separate and disperse. Among the unifying ones, certain examples endure for reasons that are hard to pin down. These tend to become anchors that shape how surrounding things arrange themselves, usually without anyone noticing the influence. In time, even these dissolve or transform, leaving their imprint on whatever emerges next.”

Round 3:

Input(Text 6 — Highly Vague): “Some patterns attract and unify while others separate and disperse. Among the unifying ones, certain examples endure for reasons that are hard to pin down. These tend to become anchors that shape how surrounding things arrange themselves, usually without anyone noticing the influence. In time, even these dissolve or transform, leaving their imprint on whatever emerges next.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Certain patterns draw things together while others push them apart. Of the ones that unify, some prove remarkably lasting in ways that resist easy explanation. These durable patterns quietly act as organizing forces, guiding the arrangement of everything around them — an influence that often goes unrecognized. Eventually, even they fade or change, yet something of their character persists in what comes after.”

Round 4:

Input(Text 6 — Highly Vague): “Certain patterns draw things together while others push them apart. Of the ones that unify, some prove remarkably lasting in ways that resist easy explanation. These durable patterns quietly act as organizing forces, guiding the arrangement of everything around them — an influence that often goes unrecognized. Eventually, even they fade or change, yet something of their character persists in what comes after.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Some patterns create cohesion while others create division. Among the cohesive ones, certain examples endure with a persistence that's hard to fully account for. These long-lived patterns function as invisible structuring forces, shaping how surrounding elements arrange themselves — usually without anyone noticing. In time they too dissolve or transform, yet their essential nature leaves an imprint on whatever follows.”

Round 5:

Input(Text 6 — Highly Vague): “Some patterns create cohesion while others create division. Among the cohesive ones, certain examples endure with a persistence that's hard to fully account for. These long-lived patterns function as invisible structuring forces, shaping how surrounding elements arrange themselves — usually without anyone noticing. In time they too dissolve or transform, yet their essential nature leaves an imprint on whatever follows.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Some patterns bring things together while others drive them apart. Of the unifying ones, certain instances prove remarkably durable in ways that are difficult to fully explain. These persistent patterns operate as hidden organizing forces, quietly influencing how the elements around them take shape — largely beneath conscious awareness. Eventually they fade or change form, yet something of their character persists in what comes after.”

Round 6:

Input(Text 6 — Highly Vague): “Some patterns bring things together while others drive them apart. Of the unifying ones, certain instances prove remarkably durable in ways that are difficult to fully explain. These persistent patterns operate as hidden organizing forces, quietly influencing how the elements around them take shape — largely beneath conscious awareness. Eventually they fade or change form, yet something of their character persists in what comes after.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Certain patterns act as cohesive forces, binding elements together rather than separating them. Among these, some endure with a staying power that resists easy explanation. Working largely out of sight, these long-lasting patterns function as invisible scaffolding, shaping the surrounding environment without anyone quite noticing. When they finally dissolve or transform, their essential nature lives on in whatever they leave behind.”

Round 7:

Input(Text 6 — Highly Vague): “Certain patterns act as cohesive forces, binding elements together rather than separating them. Among these, some endure with a staying power that resists easy explanation. Working largely out of sight, these long-lasting patterns function as invisible scaffolding, shaping the surrounding environment without anyone quite noticing. When they

finally dissolve or transform, their essential nature lives on in whatever they leave behind.”
Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Some patterns hold things together rather than pull them apart, and certain ones prove remarkably durable in ways that are hard to fully account for. Operating quietly beneath the surface, these persistent structures exert a shaping influence on everything around them — yet their presence often goes unnoticed. Even when they eventually break down or shift into something new, their character persists in the traces they leave behind.”

Round 8:

Input(Text 6 — Highly Vague): “Some patterns hold things together rather than pull them apart, and certain ones prove remarkably durable in ways that are hard to fully account for. Operating quietly beneath the surface, these persistent structures exert a shaping influence on everything around them — yet their presence often goes unnoticed. Even when they eventually break down or shift into something new, their character persists in the traces they leave behind.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Some structures bind rather than divide, and they tend to last in ways that resist easy explanation. Working beneath the surface, they quietly shape what surrounds them without drawing attention to themselves. And even as they dissolve or transform, something of their essential nature lingers in what they leave behind.”

Round 9:

Input(Text 6 — Highly Vague): “Some structures bind rather than divide, and they tend to last in ways that resist easy explanation. Working beneath the surface, they quietly shape what surrounds them without drawing attention to themselves. And even as they dissolve or transform, something of their essential nature lingers in what they leave behind.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Certain frameworks unite rather than separate, and they endure in ways that are hard to fully account for. Operating out of sight, they subtly influence their environment without seeking notice. And even when they break down or change form, something of their core character persists in what remains.”

Round 10:

Input(Text 6 — Highly Vague): “Certain frameworks unite rather than separate, and they endure in ways that are hard to fully account for. Operating out of sight, they subtly influence their environment without seeking notice. And even when they break down or change form, something of their core character persists in what remains.” Paraphrase this in your own words. Output only the paraphrase.

Output(Text 6 — Highly Vague): “Some structures have a rare capacity to bring things together rather than drive them apart, and they last in ways that resist easy explanation. They work quietly in the background, shaping the world around them without calling attention to themselves. And even as they weaken or transform, something essential about what they were continues to live on in whatever comes after.”

Results Text 6:

Original text: “Some patterns gather and others scatter. Among those that gather, a few endure for reasons that are not always visible. They become the kind of thing that others orient around, even when no one can quite say why. In time, they fade or transform, and what comes next reflects what they were.”
Final: “Some structures have a rare capacity to bring things together rather than drive them apart, and they last in ways that resist easy explanation. They work quietly in the background, shaping the world around them without calling attention to themselves. And even as they weaken or transform, something essential about what they were continues to live on in whatever comes after.”

Outcome: **Semantic stability partially preserved.** The abstract "patterns" framing survived all 10 rounds without committing to a specific domain (unlike Gemini Flash, which committed to "social institutions" by round 2); the "gather/scatter" duality and the "reasons not always visible" mystery both held. Drifts: "patterns" softened into "structures/frameworks," length expanded, and "a few" intensified into "rare capacity." Run in Claude Sonnet 4.6 Incognito, 10 rounds.

Meaning Theory Experiment — Results Summary

Cross-model semantic stability under iterated paraphrase (3 rounds for Texts 1–4; 10 rounds for Texts 5–6).
Stable = meaning fully preserved; Partial = wording drifted, vague meaning held; Unstable = semantic collapse.

Conclusion

Six texts of varying structural specificity were tested across up to five LLMs (Gemini 3.1 Pro, Gemini 3 Flash, ChatGPT 5.5 Instant, GLM 4.7, Claude Sonnet 4.6) under iterated paraphrase. The results show a clear gradient:

- **Structured texts (1, 2):** Meaning preserved across all five models. Entities, numbers, and logical structure survived three rounds without exception.
- **Moderately vague texts (3, 4):** Mixed result. Text 3 showed uniform partial preservation across all models — wording drifted, vague meaning held. Text 4 collapsed in 3 of 5 models, with GLM 4.7 and Claude Sonnet 4.6 partially resisting.
- **Highly vague texts (5, 6) at 10 rounds:** Severe model-dependent drift. Gemini 3 Flash collapsed both texts into specific committed readings (Text 5 added "human history" and inverted "some recognized" to "no one"; Text 6 committed to "social institutions" by round 2). Claude Sonnet 4.6 preserved the abstraction but drifted in intensity and length.

Two patterns emerge. First, structural specificity protects meaning under paraphrase — the structured texts held universally across all models. Second, drift behavior on vague content was **consistent within each model across rounds but varied between models on the same input**. Gemini Flash compressed and committed; Claude expanded but preserved abstraction; GLM preserved framing where others collapsed. This within-model consistency combined with between-model variation suggests the drift pattern is a stable property of each model's internal architecture and training — not random noise — but is not predicted by general capability rankings (Gemini 3.1 Pro leads multiple reasoning benchmarks yet drifted on Text 4). The variation appears to reflect model-specific handling of ambiguity rather than overall intelligence.

The original strong hypothesis — that vague texts drift while structured texts hold — is partially supported. A more accurate statement consistent with this data: **specific content survives paraphrase precisely; vague content survives loosely at lower amplification but breaks under sustained amplification, with severity dependent on each model's specific architectural handling of ambiguity.**

Limitations. N=6 texts, up to 10 rounds, 5 models, author-rated scoring. Some early runs used referenced memory active; later runs used temporary or incognito sessions with consistent results where re-tested. A larger study with blind raters, more amplification operators (translation chains, compression, adversarial paraphrase), and quantitative semantic similarity metrics is warranted before stronger claims are made.

The framework's central intuition — that semantic structure interacts with amplification pressure in measurable ways — is consistent with these results. The specific operationalization tested here is a starting point, not a final form.

This pilot study suggests that semantic structures with stronger anchoring remain more stable under recursive paraphrase amplification, while highly abstract or weakly anchored structures drift more readily across iterations and models.
